Response 6: Added a voice file and got text response.

The screenshot shows a REST client interface with a search bar at the top. Below the search bar, there are tabs for different requests: "POST Audio To Spee", "POST Planned Leave Req", "GET QWEN-maxtoken", and "POST Speech to audio". The "POST Speech to audio" tab is selected. The URL bar shows the endpoint: `https://api.groq.com/openai/v1/audio/transcriptions`. The request method is "POST". The request body is set to "form-data". The body contains two fields: "file" with value "response.wav" and "model" with value "whisper-large-v3". The response status is "200 OK" with a response time of "2.46 s" and a size of "1.15 KB". The response body is shown in JSON format:

```
1 {
2   "text": " Huge applause to the Testleaf team for delivering one of the best explanations in the Agentic AI course. The
3   "x_groq": {
4     "id": "req_01krjx3sa6e399p2rf1smzdvp2"
5   }
6 }
7
```

Faced issues below

To enter a proper endpoint url

Learnt how to add voice file & model. Understood that speech to text model should have a mandatory field “model” and the value should be copied from groq.

Request 7:

The screenshot shows the Postman interface with a REST client request configured. The URL is `https://api.groq.com/openai/v1/chat/completions` and the method is `POST`. The request body is in `raw` format (JSON) and contains the following JSON payload:

```
{
  "role": "user",
  "content": [
    {
      "type": "text",
      "text": "What's in this image?"
    },
    {
      "type": "image_url",
      "image_url": {
        "url": "https://raw.githubusercontent.com/github/explore/main/topics/python/python.png"
      }
    }
  ]
}
```

The response status is `200 OK` with a response time of `998 ms` and a size of `2.16 KB`. The response body is in `JSON` format and contains the following JSON payload:

```
{
  "created": 1778753436,
  "model": "meta-llama/llama-4-scout-17b-16e-instruct",
  "choices": [
    {
      "index": 0,
      "message": {
        "role": "assistant",
        "content": "The image is the logo for the Python programming language. The logo features two interconnecte"
      },
      "logprobs": null,
      "finish_reason": "stop"
    }
  ]
}
```

The screenshot shows the Postman interface with the response body of the REST client request. The response status is `200 OK` with a response time of `1.07 s` and a size of `1.83 KB`. The response body is in `JSON` format and contains the following JSON payload:

```
{
  "created": 1778753436,
  "model": "meta-llama/llama-4-scout-17b-16e-instruct",
  "choices": [
    {
      "index": 0,
      "message": {
        "role": "assistant",
        "content": "The image is the logo for the Python programming language. The logo features two interconnecte"
      },
      "logprobs": null,
      "finish_reason": "stop"
    }
  ]
}
```

Faced access issue with image URLs . Other than that able to get the response.
